

# Architecture Soft Skills

## Part 2

# architecture soft skills

# leadership and communication

leadership and communication

A yellow line starts from a box labeled 'architecture aspects' and curves upwards and to the right, then continues as a straight horizontal line to the text 'leadership and communication'.

architecture aspects

# leadership and communication

## three c's of architecture

# leadership and communication

## *communication*

effectively communicate ideas, concepts,  
issues, and solutions to stakeholders

# leadership and communication

## *collaboration*

get stakeholders involved in the  
architecture process and solicit ideas and  
feedback early and often

# leadership and communication

*clarity*

articulate the architecture solution in clear and concise terms as appropriate to each stakeholder

# leadership and communication

## translation skills

# leadership and communication translation skills

"our business is constantly changing  
to meet new demands of the  
marketplace"

extensibility, maintainability, agility

# leadership and communication translation skills

“due to new regulatory requirements,  
it is imperative that we complete end-  
of-day processing in time”

performance, scalability

# leadership and communication

## translation skills

"we need faster time to market to remain competitive"

maintainability, agility

# leadership and communication translation skills

"our plan is to engage heavily in mergers and acquisitions in the next three years"

scalability, extensibility, openness,  
standards-based, agility

# leadership and communication

## translation skills

“we have a very tight timeframe and budget for this project”

feasibility

# technical knowledge

leadership and communication

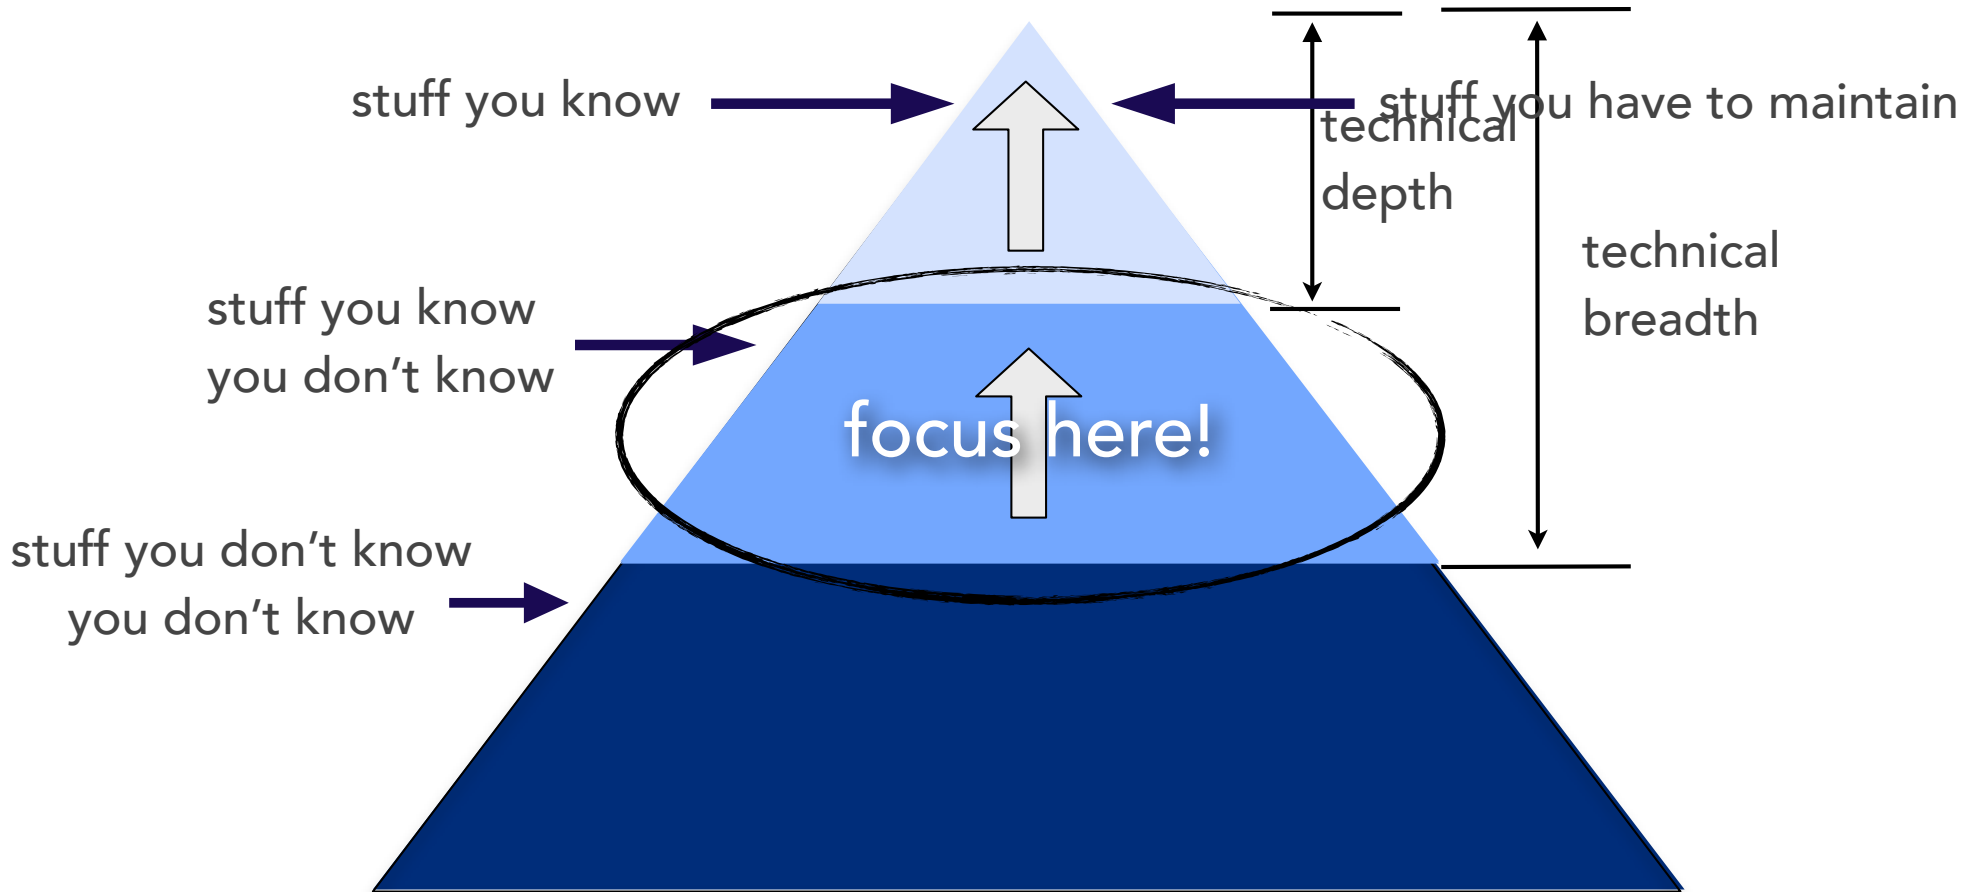

technical knowledge

architecture aspects

```
graph LR; A[architecture aspects] --> B[technical knowledge]; A --> C[leadership and communication];
```

The diagram illustrates the relationship between 'architecture aspects' and two other concepts. A box labeled 'architecture aspects' is connected by a yellow line to 'leadership and communication' and by a purple line to 'technical knowledge'. Both target concepts are also connected to a common point above the box by curved lines of the same color.

# technical knowledge

# technical knowledge

## multi-platform knowledge

as a  
you

every solution  
ution

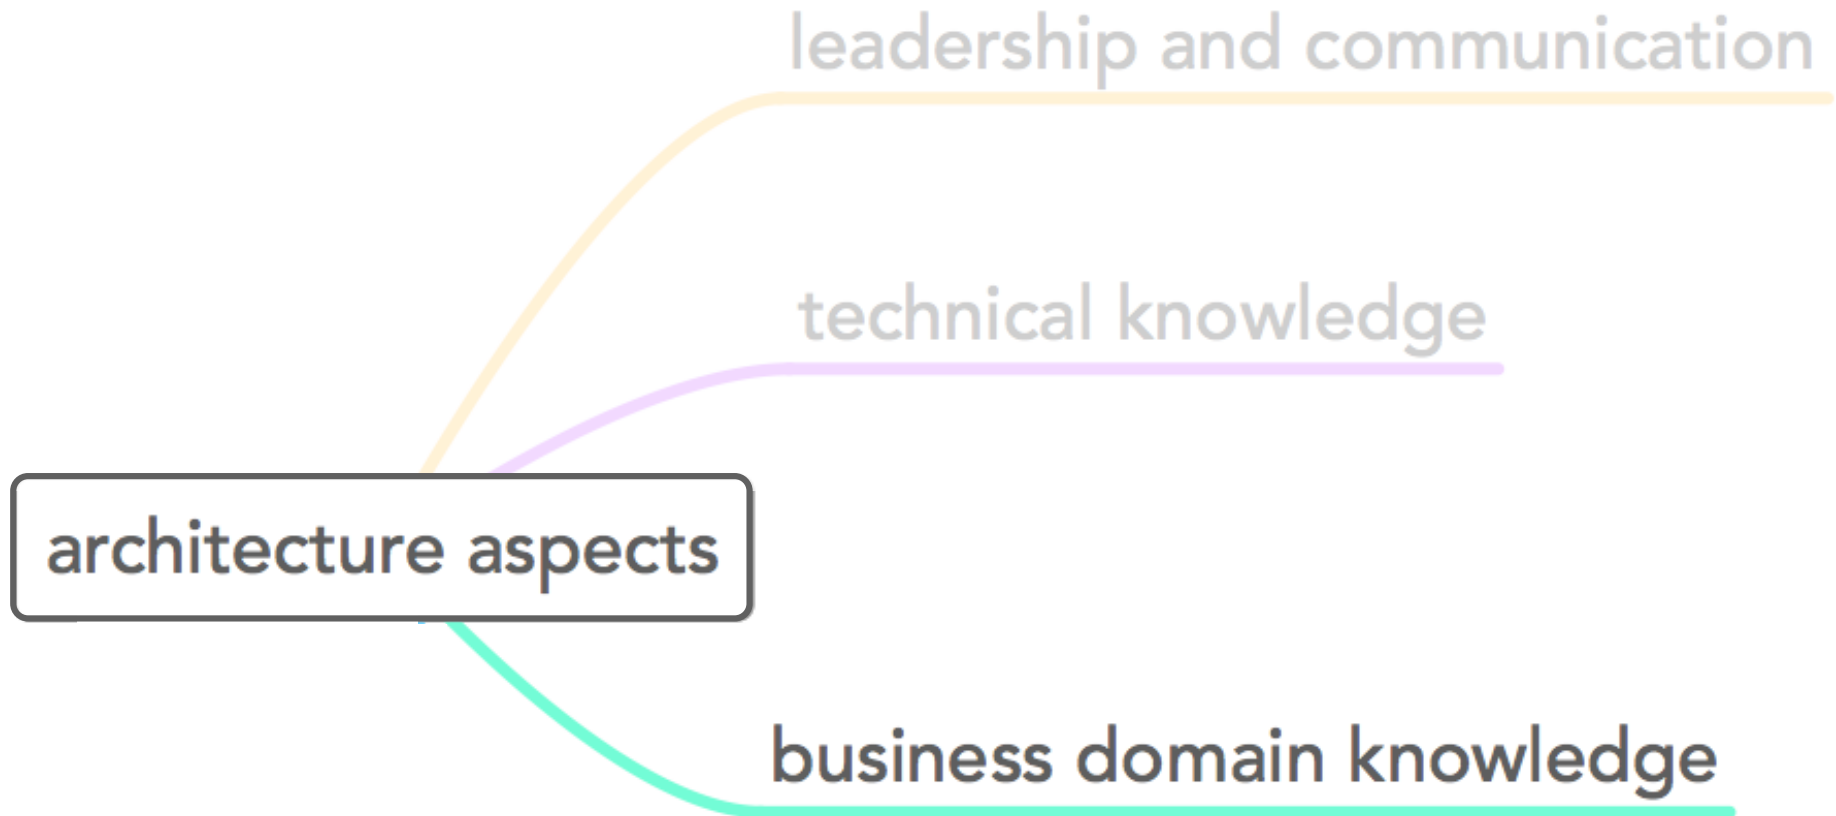

as a

captives

non-priority debt

market cap

binder

c-share variable annuities

aleatory contract

# business domain knowledge

why knowing the business is critical

communicate better with the business

better understand business goals, issues, and trends

gain trust by speaking the business language

design the system to better handle future changes

better determine the correct architecture pattern

# methodology and strategy

leadership and communication

technical knowledge

architecture aspects

business domain knowledge

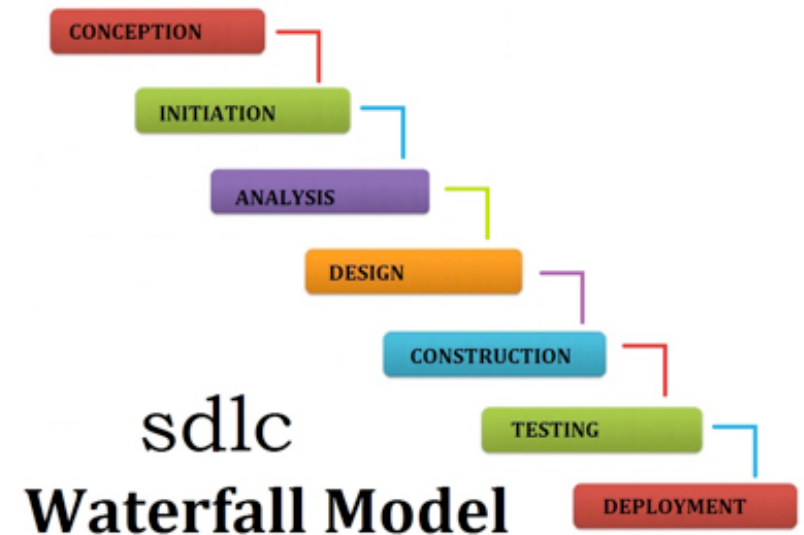

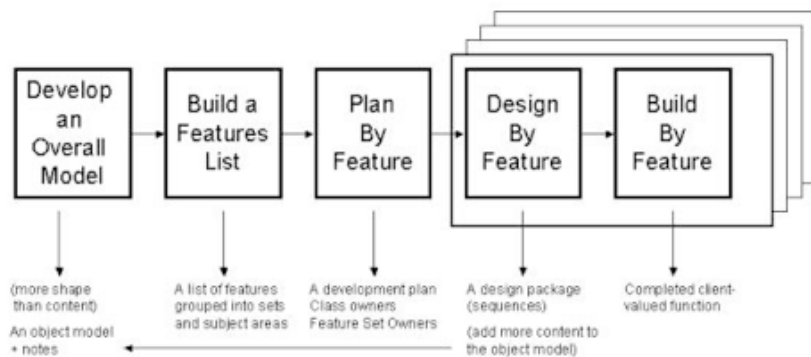

methodology and strategy

# methodology and strategy

once you know *where* to go,  
*how* do you get there?

# methodology and strategy

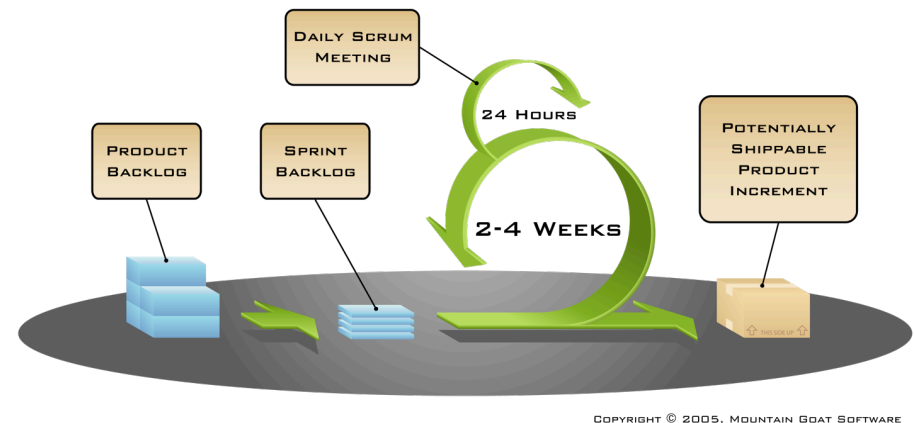

# methodology and strategy

incomplete requirements

you expect a lot of change

tight budget and timeframe

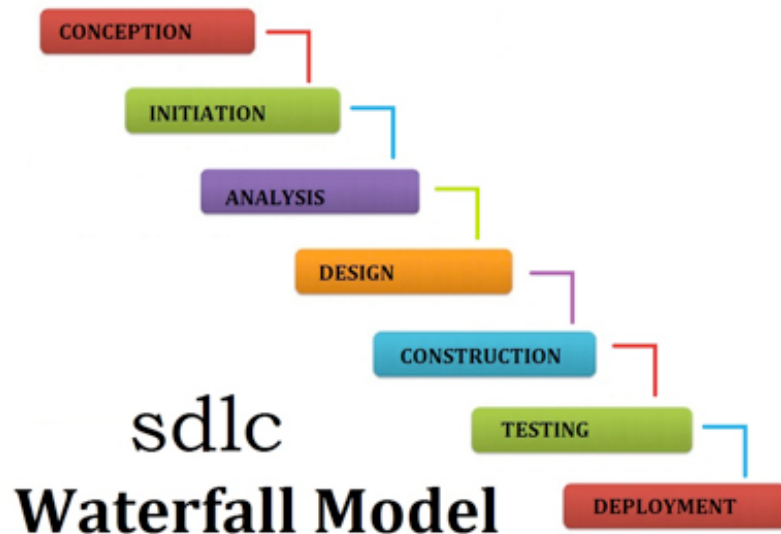

# methodology and strategy

large and complex project

multiple remote teams

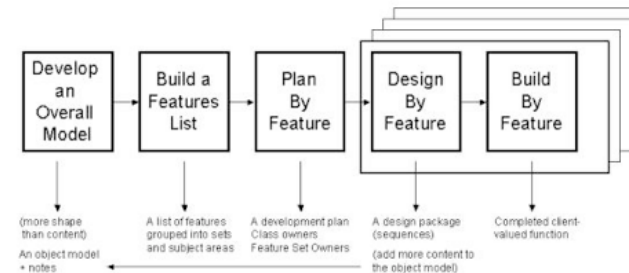

integrated maintenance

# methodology and strategy

try to create a hybrid to  
strike the right balance

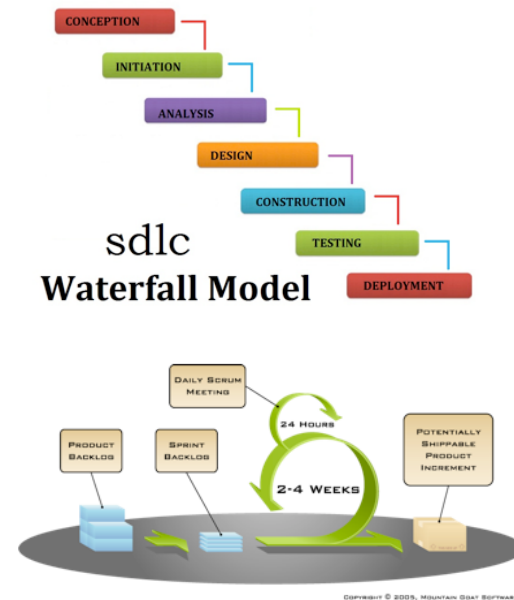

## FDW Feature-driven Waterfall

# methodology and strategy

try to create a hybrid to  
strike the right balance

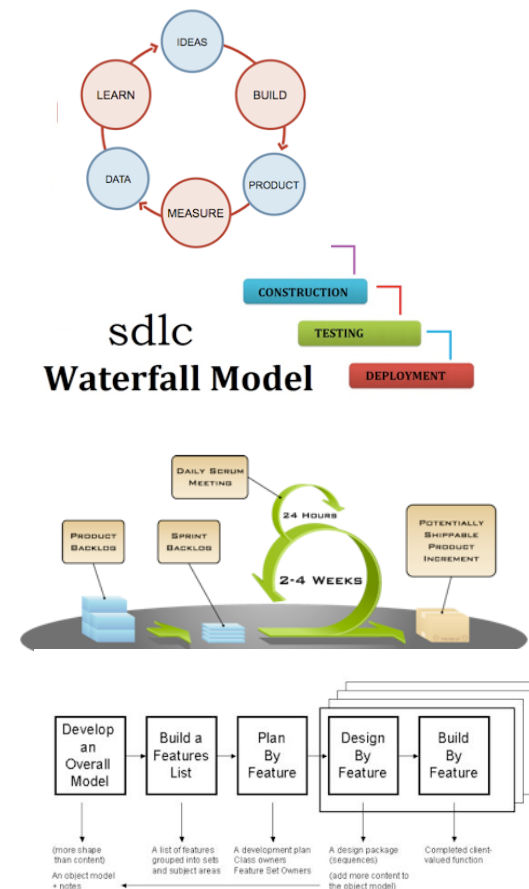

WaterScrum

# methodology and strategy

try to create a hybrid to  
strike the right balance

Lean-driven  
WaterScrum

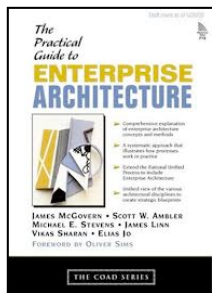

# methodology and strategy

regardless of what you do,  
as an architect you have to  
make it work!
